

R.A. Daffer Church Organs, INC.
ESTABLISHED 1977

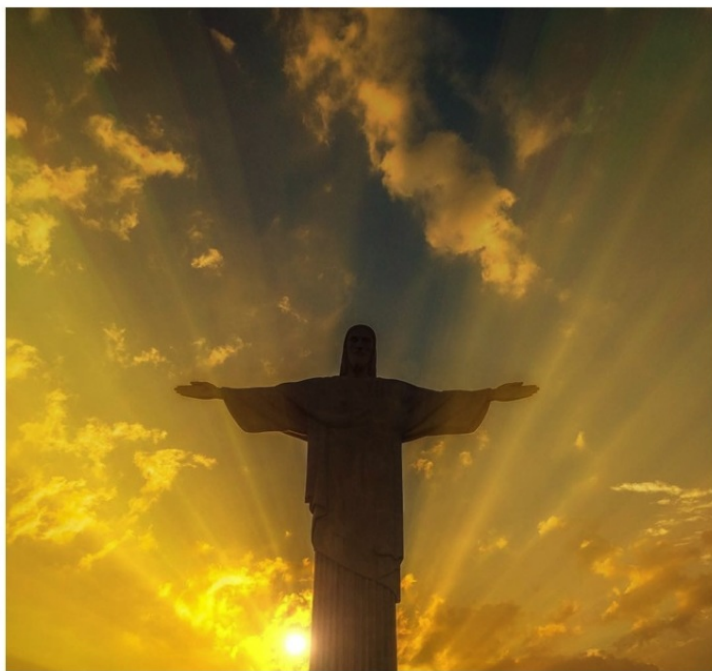

Happy Easter

We understand just how busy all of our friends are this week! Why? We are organists and church musicians too! All of our sales representative, two of our owners, and several of our technicians play for worship each week. So just incase you need that last minute postlude, here is a gift for you!

A GIFT TO YOU FROM RODGERS INSTRUMENTS

THINE BE THE GLORY

from Judas Maccabeus, by George Frederick Handel

an easy organ arrangement with minimal pedal
by Dan Miller

Rodgers Three Manual replaces the competition.

Unity Moravian Church, Lewisville, NC

The new organ at Unity Moravian Church in Lewisville, NC is a Rodgers Imagine 351-T installed on 8 channels of audio. It replaces an organ from a competitive brand that was from the late 1970s. The committee consisted of Pastor Scott Rainey (who is also a fine organist, David Blum (Director of Music), Dennis Fort (Committee Chair), and Donna Shore (organist). The committee traveled to Macedonia Lutheran Church in

Burlington, NC to hear a 351M that replaced a 30 rank Moller pipe organ. The demo was played by Mr. Monty Bennett who is an organist based in the Charlotte, NC area. The committee listened to one other brand of digital organs but in Pastor Rainey's words he felt the Rodgers was the closest to a pipe organ sound and said he also felt the organ out in the room which did not happen with the other brand. Many thanks to all who put in the time to make the trips and the final decision.

The Beating Heart of a Rodgers: Our Direct Streaming Technology

Revolutionizing Digital and Hybrid Organs

ALL Voices available INSTANTLY

With DSCore Technology, every voice in the organ - pipe, orchestral, midi - are available instantly and in real time. The organ starts up in seconds, and there is no waiting for sample sets to load. DSCore avoids RAM storage and sends samples DIRECTLY from the NAND Flash to the DSP.

No Delay

NO SACRIFICES

There is NO BORROWING or DUPLICATION in Rodgers Organs with DSCore Technology. From the smallest specification to infinity, every note of every stop is its own dedicated and long sample. Organists are empowered to play thousands of long-looped samples of pipes.

No Borrowing
or Duplicating

STEWARDSHIP for a LIFETIME

Our Direct Streaming technology was developed by our in-house engineering team. Both software and hardware were designed to work together seamlessly, and all storage components are industry level. All of this ensures an extremely stable technology, and a longer lifetime compared to consumer electronics.

Long Life
for Investment

The True Sound of Iconic Pipe Organs

At Rodgers, we truly understand the American pipe organ. During our 60+ year history, we built our own pipes, and successfully pioneered digital and hybrid organs. Over the years, we've recorded countless renowned pipe organs using our state-of-the-art recording equipment. All these beautiful organs were recorded stop by stop, key by key – ensuring that the character of each pipe is truly captured.

Thousands of top-quality, long-looped samples of Aeolian Skinner and renowned European organ builders are stored inside each Rodgers organ. With each key you press, the organ reproduces the

beautiful sound of an iconic pipe organ.

The Perfect Practice Organ

Find out why the Johannus Studio 280 or 380 is the perfect practice organ. Visit our showroom to experience this powerful player in home studio instruments.
